

Complete Ingredient List & Definitions

Aloe Vera Leaf

A stemless perennial evergreen plant belonging to the lily family. The gel from the inner core of the leaf is rich in glucomannans and other polysaccharides. Recent studies have shown that aloe vera gel facilitates tissue repair. It hydrates and has many skin soothing properties.

Amazon Extracts

Concentrated aqueous extracts made in a proprietary cold-process with distilled water and a blend of Rainforest plants. Each plant is specially selected for its skin-regenerating, antioxidant, and soothing benefits. Each Amazon Rain skin care product includes an herbal blend specifically formulated and targeted for its therapeutic purpose.

Andiroba Seed Oil

Andiroba is a tall tree which grows to a height of 130 meters. Loaded with Fatty acids (65%) including oleic, linoleic, palmitic and stearic which help to maintain the skin's moisture barrier. It has soothing benefits.

Aspen Bark (Populus tremuloides)

Rich in salicylic acid, an aspirin-like substance, Aspen Bark extract is a great anti-inflammatory ingredient. Aspen bark extract also makes an excellent alternative to chemical preservatives.

Basil Leaf Oil

Basil Essential Oil contains terpenes, eucalyptol, limonene, methyl chavicol and linalool which provide stimulating, purifying and soothing benefits.

Benzoin

The Benzoin tree is native to the tropical areas of the Far East. The resin or sap from the tree has antioxidant properties and is used to soothe and calm the skin.

Bergamot Fruit Oil (Citrus aurantium bergamia)

Bergamot oil has some great antiseptic and antibiotic properties when topically applied to the skin and for this reason is often used to help sort out problem acne skin.

Brazil Nut Oil (Bertholletia excelsa)

Brazil nut is high in essential fatty acids, amino acids, zinc, vitamin A and E and selenium an important antioxidant. Brazil nut oil lubricates and moisturizes skin, helps prevent dryness, and promotes a clear complexion.

Burti Fruit Oil (Mauritia flexuosa)

Burti oil is the richest source of beta carotene (higher than carrot oil) and is rich in carotenoids. It is an excellent source of oleic fatty acids and has a full profile of other essential fatty acids (EFAs). These compounds support the production of collagen and elastin to make skin soft and supple. It has emollient properties, is a free-radical scavenger, protects against sun-related skin aging factors and soothes skin.

Camu Camu

The Camu Camu's fruit produces the highest concentrated source of naturally occurring vitamin C—thirty times more than an orange—and ten times as much iron, three times as much niacin, with twice as much riboflavin, and fifty percent more phosphorus. It is a significant source of potassium, minerals and amino acids. It boosts collagen production which supports the skin's firmness and elasticity and has astringent qualities which helps to reduce pore size.

Caprylyl Glucoside

Caprylyl/Capryl Glucoside is a non-ionic surfactant derived from vegetable origin. It is an ideal solubilizing agent for foaming products because it solubilizes essential oils, fragrances and preservatives but also boosts foam volume. Its mild cleansing effect is interesting for the formulation of make up removers, especially lotion.

Carrot Root Oil (Daucus carota)

Carrot Oil as a concentrated pure extract contains high levels of carotenes that protect skin from UV rays and free radical damage. It assists in removing toxins and has regenerating and toning effects giving skin a fresher, firmer appearance.

Chondrus Cripus (Carrageenan)

For centuries this algae has been used in traditional medicine for its emollient and soothing action. It is used as a poultice for inflamed tissue and in lotions to soften skin and prevent premature aging.

Coconut Emulsifier

Derived from coconut oil, a semi-solid saturated fat cold-pressed from the flesh of coconuts. A lubricant and moisturizer, it functions as a natural emulsifying agent to disperse oil-soluble ingredients into a water base.

D-Panthenol

Panthenol is the precursor to pantothenic acid (vitamin B5). It is made from a component found in honey, d-pantolactone. It improves the moisture-retention capacity of the skin, stimulates skin regeneration and soothes skin. It helps dry skin stays supple and elastic longer.

Diatomaceous Earth (Silica Crystals)

Silica helps with skin problems and injuries including itching, rashes, abscesses, boils, acne, calluses, warts, eczemas, burns, frostbite, benign skin sores, insect bites and bed sores. If you regularly follow a silica regimen, your skin will keep its young look.

Elemi Leaf Oil

An essential oil distilled from the gum of a tree originating in the Philippines. It is in the botanical family of frankincense and myrrh. Applied topically, it is antiseptic and restorative to skin. It is traditionally used to rejuvenate aging skin. It's refreshing, lemony fragrance is uplifting.

Espinheira Santa Leaf

Espinheira santa is a small, shrubby evergreen tree growing 5 m in height with leaves and berries that resemble holly. It helps to detoxify the skin and provides protection from aging associated with exposure to the sun.

Fennel Oil (Foeniculum vulgare)

Fennel essential oil is used for its soothing, cleansing and toning effects on the skin, while at the same time improving circulation and fighting water retention and puffiness.

Fir Needle Essential Oil

Fir needle essential oil comes from the Pinus type tree. It is known for its soothing and calming action and its refreshing and stimulating fragrance.

Frangipani Flower Oil

A fragrant, traditional 'sacred' flower that helps skin to look rejuvenated, refreshed and radiant.

Grapefruit Peel Oil

Grapefruit seed extract contains high levels of vitamin C and E, and bioflavonoids. Its antioxidant action can neutralize free radicals. Also provides alkalizing and natural preservative benefits in Amazon Rain skin care products.

Glucose

Glucose is a simple sugar used as the source of energy by living cells. It is produced by plants as one of the main products of photosynthesis.

Horsetail Leaf (*Equisteum arvense*)

Horsetail contains important skin nutrients including: silicon, calcium, iron, magnesium, zinc, manganese, phosphorus, potassium, selenium, thiamine, riboflavin, niacin and ascorbic acid. Horsetail helps protect against free-radical damage and strengthens connective tissue. It refreshes, tones, stimulates and firms skin tissue.

Iporuru

A medium sized tree that grows in the lower elevations and flood plains of the Peruvian Amazon. It contains alkaloids, phenols and tannins that provide antioxidant, soothing and calming skin benefits.

Jjoba Seed Oil

Jjoba oil is a yellow liquid wax pressed from the bean of the Jjoba plant. It contains a waxy substance, similar to skin sebum, which allows it to easily penetrate skin. Jjoba has excellent protective and moisturizing properties giving skin a silky, smooth feel.

Jatoba Bark

Jatoba is a large tree in the Amazon Rainforest. It contains numerous active compounds including terpenes and phenols that help to cleanse, purify and soothe the skin.

Lecithin

Lecithin is an emollient, which is a softening and soothing agent. In addition, it has magnificent moisturizing properties, and helps to hydrate the skin. The phospholipids naturally present in Lecithin are able to attract water from the air, and in doing so, increase hydration.

Litsea Cubeba Essential Oil

Also known as 'May Chang', it is used for its soothing and astringent properties.

Mango Seed Butter

Obtained from the fruit seed of the Mango tree, it provides excellent moisturizing and lubricating skin benefits. It is antioxidant, vitamin and mineral rich.

Marine Algae/ Algae Extract

All species of marine algae are rich in minerals, vitamins, amino acids and micro-nutrients. The use of algae has been associated with many skin-nourishing benefits including skin cell regeneration. It is especially known for its humectant hydrating quality of holding water in skin. It also energizes skin cells-increasing blood flow at the skin's surface to help draw out impurities.

Melissa Essential Oil

Also known as 'lemon balm', melissa purifies skin and helps calm skin. It's aroma has a wonderful uplifting and refreshing effect that boosts the spirit.

Mineral Ash

The Rainforest soil is rich with naturally occurring mineral composites, which are absorbed by plants. Our spagyric processing reduces the plants' cellulose to an alkaline mineral ash used to mineralize and nourish your skin

Olive Squalane

A unique antioxidant from olives that protects skin and the oils in Amazon Rain products from free-radical damage. This effect helps reduce skin damage caused by the environment including sun related photo-aging. This facilitates easy, rapid penetration assuring delivery of moisture and nutrients to skin tissues. It enhances skin elasticity and moisture retention.

Passion Fruit Seed Oil (Passiflora Incarnate)

A powerful source of bioflavonoids, Passion Flower Seed Oil strengthens tissue, promotes sebum regulation which balances oil secretion in skin. It is rich in fatty acids including up to 77% linoleic fatty acid and provides soothing, moderate moisturizing benefits. This beautiful rainforest plant contains a full profile of potassium and vitamins A, B and C, essential to healthy skin.

Pentavitin (Saccharide Isomerate)

Pentavitin is an effective moisturizer containing natural carbohydrates found in the stratum corneum of human skin. It binds to the free amino groups of lysine in the keratin of the stratum corneum, and cannot be washed off easily, leading to long-lasting moisturization

Peppermint Essential Oil

An aromatic refreshing, energizing oil that stimulates circulation in skin and has antimicrobial properties.

Plant Carbohydrate Complex

A blend of plant sugars containing a high level of mucopolysaccharides which have a strong ability to hold water in skin.

Quinoa Extract (Chenopodium)

Quinoa is filled with essential fatty acids (linoleic, linolenic and oleic) along with amino acids, saponins, minerals (calcium, phosphorus, magnesium, iron and zinc) and vitamins (thiamin, niacin, and riboflavin) all important for healthy skin structure.

Red Marine Algae (Ahnfeltia concinna)

Compounds such as carotene and flavonoids that occur naturally in plants and promote human health by strengthening the human immune system. They are thought to reduce the risk of cancer and chronic diseases.

Rosehip Seed Oil

An excellent source of trans-retinoic acid (vitamin A) in a natural form. Rosehip Seed Oil contains a generous complement of unsaturated fatty acids and essential fatty acids (vitamin F). It significantly helps retard aging in skin and helps smooth the appearance of uneven skin tone.

Samambaia

The Rainforest fern Samambaia contains a host of phytochemicals including flavanoids, alkaloids, lipids, calagualine, ecdysone, elaidic acid, linoleic acid, linolenic acid melilotoside, oleic acid, rutin an ricnoleic acid. Recent studies show its benefits to skin. Samamabaia's antioxidant compounds provide protection from the environment reducing the appearance of aging.

**Sandalwood Essential Oil/
Amyris Oil**

The pure essential oil from Sandalwood is known to strengthen connective tissue and the dermis. It helps water retention in the skin. It is also cooling, calming and soothing to skin. It is excellent for all skin types.

**Sangre de Drago
(Croton lechleri)**

Called "Blood of the Dragon," the red sap of this Amazonian tree is used to support skin repair and regeneration, calm skin irritation and fight the effects of aging. It contains up to 90% proanthocyanidins (OPC's), a very potent class of antioxidant compounds. In addition, studies have shown the presence of taspins. These unique nutrients stimulate the migration of fibroblast cells responsible for tissue regeneration.

Sodium Ascorbate

A buffered form of ascorbic acid (vitamin C), it is used as a pH balancer in skin care products. It also has antioxidant and preservative properties.

**Sodium PEG 7 Olive Oil
(Saponified Olive Oil)**

A natural cleansing agent made from olive oil and containing no harsh detergents. Cleans skin leaving it feeling lightly moisturized and hydrated. Olive oil contains moisturizing fatty acids and is a source of antioxidants.

Stevia

Commonly known in South America as "yerba dulce" meaning sweet herb. Contains glucosides and terpenes. Helps to bind water providing hydrating benefits and to tighten and smooth the skin diminishing the appearance of wrinkles. It's hydrating effect has been shown to be 3 times greater than glycerin.

**Suma Root
(Pfafia Paniculata)**

The root of the Brazilian suma plant contains phytochemicals, electrolytes, trace minerals, magnesium, zinc, vitamin A, B1,B2, E, K, panthothenic acid,germanium and 19 different amino acids – all of which nourish the skin and increase skin metabolism. Suma also strengthens the skin's natural water barrier and gives skin a softer appearance.

Tangerine Peel Oil

A calming essential oil with slight astringent properties that also helps to alleviate fluid retention and decongest skin.

Tayuya Root

Tayuya is a woody vine found throughout Brazil and many parts of the Amazon rainforest. It belongs to the gourd family. Contains flavones and alkaloids that provide antioxidant and anti-aging benefits.

**Tea Tree Leaf Oil
(Melaleuca alternifolia)**

Native to Australia, the pure essential oil from the leaves of the tea tree is a potent antiseptic and soothing oil. It is also calming to skin and mildly astringent.

**Tetrahexyldecyl ascorbate
(Vitamin C)**

Tetrahexyldecyl Ascorbate is considered a mild version of Vitamin C and has the ability to increase collagen levels, reduce melanin production, brighten skin, and repair the effects of UV exposure and other environmental damage.

Uña de Gato
(Uncaria tomentosa)

Also known as "cats claw", Una de Gato is a vine that grows up into the canopy of the Rainforest. It contains a group of oxindole alkaloids with proven antioxidant properties. New research from the University of Lund in Sweden has proven the herb's powerful antioxidant, free radical fighting ability. It was shown to protect the DNA against damage making it may be a powerful weapon against visible signs of aging. Una de Gato also contains glycosides that help soothe and refresh the skin.

Vanilla Fruit oil
(Absolute Oil Blend)

Extracted from the bean pods of a tropical orchid. Vanilla is warming, soothing and calming to skin.

Vegetable Glycerin

Vegetable Glycerin is naturally derived from vegetable oils. It has been used for thousands of years as a humectant, emollient and lubricant.

Vetiver Essential Oil

Vetiver oil is distilled from the roots of a tall tough wiry perennial grass with a straight stem. It's anti-aging skin benefits are nourishing, restorative and moisturizing. It's calming benefits effect both the skin and the mind.

Vitamin E Oil

A powerful antioxidant, that works to protect cells by neutralizing free-radical damage. The term vitamin E refers to a family of eight, lipid soluble, antioxidant compounds widely distributed in plants. The tocopherol and tocotrienol subfamilies are each composed of alpha, beta, delta, and gamma vitamers having unique biological effects. Many studies have shown the benefits of vitamin E and skin health.

Xanthan Gum

Derived from corn sugar, xanthan gum is used as a thickener, stabilizer, emulsifier and skin soother.

Ylang Ylang Oil

On the skin, ylang-ylang oil has a soothing effect and its balancing action sorts out over-dry as well as overly-oily skin by balancing the secretion of sebum, and has a stimulating effect on the scalp which promotes more luxurious hair growth.
